Subject: Construction Coordination - Bremerton Gas Works

Hello Pat –

Per our previous discussions, we are working on behalf of Cascade Natural Gas in coordination with the EPA to address conditions at the Former Bremerton Gasworks located at 1725 Pennsylvania Avenue in Bremerton. We have been directed by EPA to perform an action on the beach directly west of Port Washington Marina in Bremerton (where your crews delineated a 12-inch PVC sewer force main.) On Monday October 14, starting at 4am, we will be smoothing the beach surface, placing a reactive core mat on the surface, and covering the mat with streambed cobbles. The approach is essentially the same as was conducted in 2010 in the eastern portion of the beach. Protecting the force main is a key component of the action.

This e-mail and voicemail are notification that the work is being conducted and a request for confirming the appropriate emergency contact information. We have your emergency contact information as follows:

- Cell -360 981 3995
- Office - 360 473 5327

Can you provide us with an alternate emergency number in the event you are not available? Please do not hesitate to contact me with questions.

Thank you,

Nathan Soccorsy
